- ✓ Space-saving

Manual
Equipped with the hoist
m.lift 400

Electric
Equipped with the hoist
e.lift 350

The *single-seat bosun* chair is designed for carrying out inspections or facade work in a seated position; it is an alternative to the suspended platform and differs in that the bosun chair only uses one hoist (manual or electric) for lifting people.

The single-seat bosun chair is ideal for working in confined spaces and restricted access and can be put into service quickly on construction sites.

It can be suspended from hanging systems such as suspension beams or parapet clamps.
